

§ 779.263

level.” Federal excise taxes on gasoline, tires, and inner tubes, when “separately stated,” may therefore be excluded in computing the annual gross volume of an enterprise for the purpose of determining coverage under section 3(s)(1) of the Act and section 13(a)(2) for purposes of applying the \$250,000 test for determining the retail and service establishment exemption of an establishment in a covered enterprise.

§ 779.263 Excise taxes not at the retail level.

There are also a wide variety of taxes levied at the manufacturer’s or distributor’s level and not at the retail level. It should be noted, however, that the circumstances surrounding the levying and collection of taxes must be carefully considered. The facts concerning the levying and collection of Federal excise taxes on alcoholic beverages and tobacco reflect that such taxes are upon the manufacture of these products and that they are neither levied nor collected at the retail level and thus are not excludable. However, in some cases the circumstances may reflect that despite the fact that such taxes may be levied upon the manufacturer or distributor, nevertheless they may be, in practical operation, taxes at the retail level and may be so regarded for the purpose of this provision.

§ 779.264 Excise taxes separately stated.

A tax is separately stated where it clearly appears that it has been added to the sales price as a separate, identifiable amount, even though there was no invoice or sales slip. In the absence of a sales slip or invoice, the amount of the tax may either be separately stated orally at the time of sale, or visually by means of a poster or other sign reasonable designed to inform the purchaser that the amount of the tax, either as a stated sum per unit or measured by the gross amount of the sale, or as a percentage of the price, is included in the sales price. A sign on a gasoline pump indicating in cents per gallon the amount of State and Federal highway fuel excise taxes is an example of “separately stated” taxes.

29 CFR Ch. V (7–1–13 Edition)

COMPUTING THE ANNUAL VOLUME

§ 779.265 Basis for making computations.

The annual gross dollar volume of sales made or business done of an enterprise or establishment consists of the gross receipts from all of its sales or its volume of business done during a 12-month period. Where a computation of the annual gross volume is necessary to determine monetary obligations to employees under the Act whether in an enterprise which has one or more retail or service establishments, or in any establishment in such enterprise, or in any gasoline service establishment, it must be based on the most recent prior experience which it is practicable to use. This was recognized in the Congress when the legislation was under consideration. (S. Rept. No. 145, 87th Cong., first session, p. 38 discusses in detail the calculation of the annual gross volume.) When gross receipts of an enterprise show that the annual dollar volume of sales made or business done meets the statutory tests for coverage and nonexemption, the employer must comply with the Act’s monetary provisions from that time on or until such time as the tests are not met. (See § 779.266.)

§ 779.266 Methods of computing annual volume of sales or business.

(a) No computations of annual gross dollar volume are necessary to determine coverage or exemption in those enterprises in which the gross receipts regularly derived each year from the business are known by the employers to be substantially in excess or substantially under the minimum dollar volume specified in the applicable provision of the Act. Also, where the enterprise or establishment, during the portion of its current income tax year up to the end of the current payroll period, has already had a gross volume of sales or business in excess of the dollar amount specified in the statute, it is plain that its annual dollar volume currently is in excess of the statutory amount, and that the Act applies accordingly. The computation described
